

Sample Presentation Form Notes and Instructions

Note: If the application and physical swatches are not properly labeled, swatches will be rejected and resubmission will be required. See below for labeling instructions.

All samples submitted for physical testing **must** be labeled. This is required regardless if only one physical swatch/sample option being submitted. There are two types of labeling – physical swatch/sample labels and mock-up component labels.

Physical Swatch/Sample Label

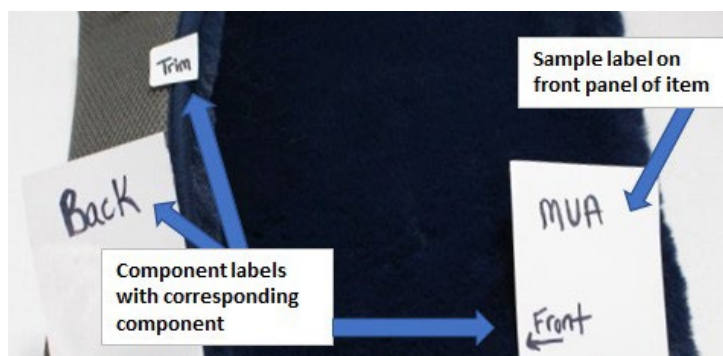

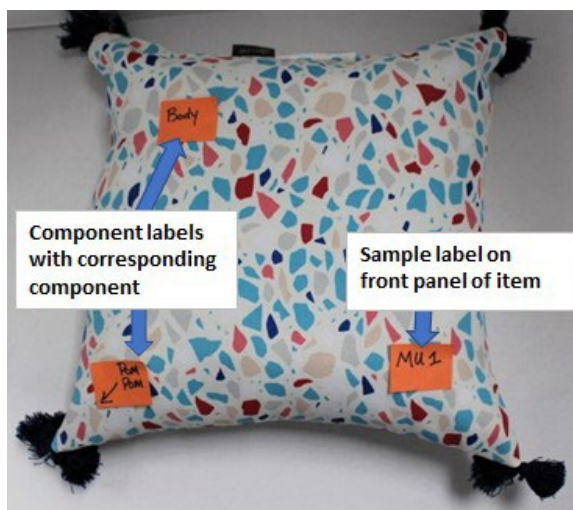

All lab dips, shade bands, wash downs, and mock-ups must include labels with unique identifying characters used for internal tracking. Physical swatch/sample labels can be as simple as a letter (A, B, C), number (1, 2, 3) etc. or any combination of the two (A1, B2, C3) etc. The unique identifier must be put on the physical swatch/sample using an adhesive label, piece of tape or permanent marker. For physical swatches, the label must be attached in the bottom right corner of each submission. For mock-ups, the sample label must be attached on the front main/body section of the item. Unique identifying labels are mandatory and required so that all parties (Walmart, UL, supplier, mill) know exactly which physical swatch/sample is being commented on throughout the color evaluation process.

Component Labels

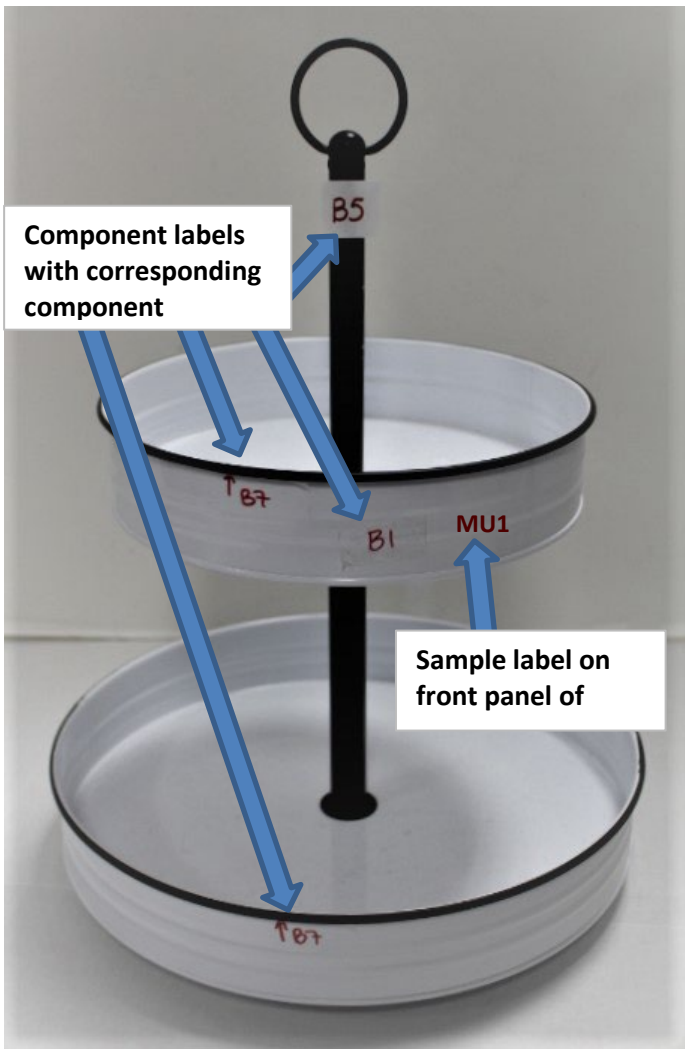

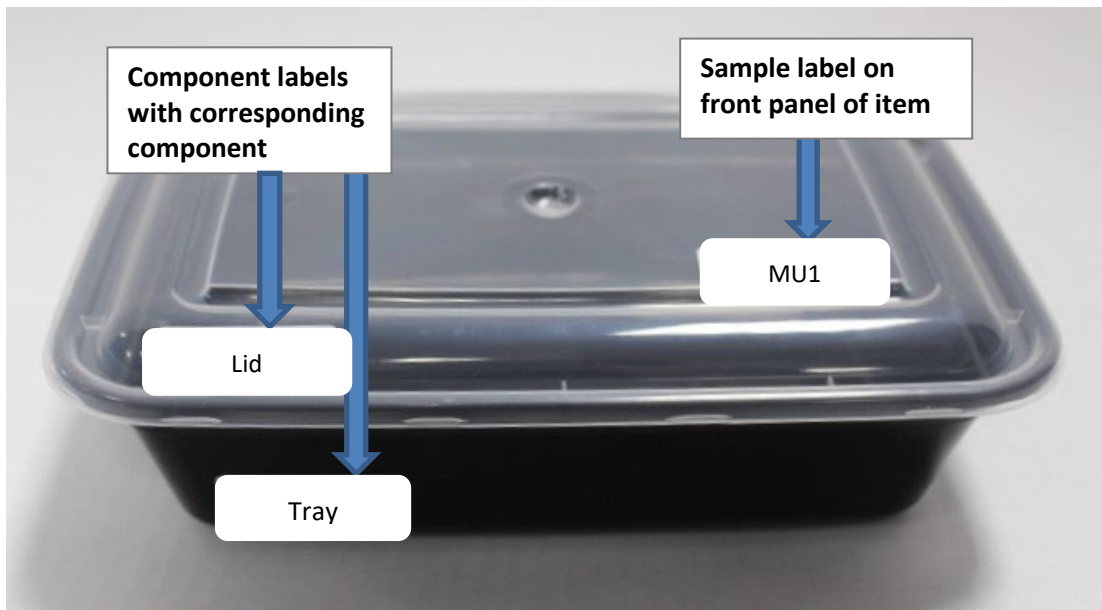

Component Labels are additional labels required for mock-ups. Each individual textile component in a mock-up must have a component label with the component name. Textile components include but are not limited to lining, rib trim, zipper tape, draw cords, etc. and would each require a component label. The component label must be put on the mock-up using an adhesive label, piece of tape or permanent marker next to or on the actual component itself.

Failure to provide **all** required labeling will result in delays and may incur additional charges.

Labeling Examples:

This page does not need to be printed or submitted with your sample(s).

**WALMART STORES / SAM'S CLUB
SOFT HOME SAMPLE
PRESENTATION FORM**

Submission Date

1. Use this form for all sample swatches.
2. Submissions must meet all minimum measurement requirements.
3. **Swatches must be labeled** with a maximum of 3 characters (i.e. A12, XYZ, or 386)
Label the swatch and the application.
